

Math—Using Framed Paragraphs

Decimals

Today in class I learned two facts about decimals. First, I learned that a fraction may be changed to a decimal by dividing the numerator by the denominator.

_____. I also learned that I can change the decimal to a percent by moving the decimal point two places to the right.

Example 1

$$1/4 = 4 \overline{)1.00}$$

$$\begin{array}{r} .25 \\ 4 \overline{)1.00} \end{array}$$

$$.25 =$$

$$25\%$$

Example 2

$$.12$$

$$=$$

$$12\%$$
